## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 2, 6-7, 11-13, 40, 3-4, 33-34, 37-39, 41, 5, 8-9, 23, 26, 28-29, 35-36 are allowed.  
(Which were renumbered as 1-24, respectively).

2. The following is an examiner's statement of reasons for allowance:

Yoneyama teaches the microscope having a driving mode for thinning the number of the pixel sizes. However Yoneyama does not teach or suggest the image pickup element driving section has a high speed reading mode for driving the image pickup element to produce an image signal by binning or thinning reading, and a low speed reading mode for driving the image pickup element to produce an image with a greater number of pixels than the image signal produced in the high speed reading mode, as shown in the specification at page 12, lines 6-20, and has a binning function for driving the image pickup element to pick up the observation image in units of an image pick up unit comprising a plurality of adjacent pixels, and whereby the controlling section sets a binning number, which indicates a size of the image pick up unit, of the image pickup element driving section based on a objective lens type outputted from the microscope controlling section, as shown in the specification pages 11, line 21 to page 12 line 5 in combination with other as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
